U-48,998/DS-6C3

MEMORANDUM FOR THE CHAIRMAN, COMPARTMENTATION SUBCOMMITTEE, SECURITY
COMMITTEE, USIB

SUBJECT: Draft (5) DCID 1/7

Reference: State Department proposed changes to Draft 5.

1. The Defense Intelligence Agency concurs with change b of referenced changes and non-concurs with change a. Change a. would place the definition of "authorized channels" in other documents which would (a) make the definition less accessible to those who may need it, (b) risk the possibility of several contradictory definitions of "authorized channels" being issued by different USIB Committees/Subcommittees, and (c) generally reduce the clarity of what the WNINTEL marking means.
2. DIA recommends the last sentence of paragraph 5 (4), page 9 be changed to read "Dissemination to specific foreign governments may be indicated by the marking: "NO FOREIGN EXCEPT (specify foreign government)". The reason is that other USIB members may also have internal programs, not involving the DCI, in which they may wish to use this marking. As written, it appears to restrict the marking to DCI established channels/programs.
3. DIA proposes for consideration the possible addition to the definition of each marking a sentence which reads essentially as follows: "For use within the DIAOLS/COINS system this marking may be abbreviated _____." These abbreviations would be:
 - a. WNINTEL - WA
 - b. Originator Control - ZA
 - c. No Contractor - ZB
 - d. Proprietary Information - ZC
 - e. NOFORN - ZD
 - f. No foreign except - ZE

This would allow integration of these markings into the DIAOLS/COINS systems without extensive and expensive reprogramming. Such abbreviations,

if acceptable, would be coordinated with the USIB IHC Standards Panel prior to implementation.
